1. Chelsea and Westminster Hospital NHS Foundation Trust

Chelsea and Westminster Hospital NHS Foundation Trust is comprised of two main hospital sites:

- Chelsea and Westminster Hospital
- West Middlesex University Hospital

We also offer a range of community based services, including our award winning sexual health and HIV clinics across London.

With more than 5,000 staff caring for nearly one million people locally, regionally, nationally and internationally, we provide a range of specialist clinical services as well as general hospital services for people living locally, which include A&E and maternity at both our hospital sites.

Our ambition is to lead the NHS with world class patient focused healthcare, delivered locally. We are driven by a culture of caring, bringing the best from around the world to deliver excellence in research, treatment and care.

Chelsea and Westminster Hospital

Chelsea Site is based on Fulham Road in the Royal Borough of Kensington and Chelsea, within walking distance of the lively Kings Road and several world famous museums (such as the Natural History and the Science Museums)

The hospital is located in central London with excellent transport links via bus (11, 14, 22, 211, 328, 414, 345 and C3) or tube (Earl's Court, Fulham Broadway and South Kensington, all within a 10 – 15 minutes’ walk to the hospital).

Chelsea and Westminster is a teaching hospital linked to the Imperial College School of London. The hospital opened in 1993 following the reorganisation of services from St Stephen’s, Westminster, Westminster Children’s, West London and St Mary Abbot’s Hospital. The hospital has approximately 430 inpatient beds and was ranked one of the top 5 hospitals in England for low mortality rates in the latest Dr Foster Hospital Guide.

Chelsea and Westminster Hospital covers a wide range of specialties, which are divided into the following five directorates: Medicine and the Emergency Department (ED), Anaesthetics and Imaging, Surgery, Women’s and Children’s and HIV and GUM.

The building is quite unlike any other hospital. As you walk through the entrance, you will understand why Chelsea and Westminster Hospital has been described as having “a feeling of light and space, unusual to most other hospitals”. Chelsea and Westminster hospital became a Foundation Trust in October 2006 which has made the Trust more accountable to patients, the public and our staff.

Art, sculpture, photography, music and performance contributed by staff, patients and friends of Chelsea and Westminster are a prominent feature of the hospital and are promoted by the
Arts of Health. Chelsea and Westminster Hospital has excellent educational facilities ranging from the on-site library, research laboratories and lecture rooms.

**West Middlesex University Hospital**

West Middlesex site is based in the London Borough of Hounslow, near Richmond, the River Thames and Twickenham Rugby Stadium.

The hospital has several transport links via bus 110, 117, 481, 267, H28, H37, 235, 635, 237 and N9), rail (Syon Lane and Isleworth) and tube (Hounslow East on the Piccadilly line which is 1.5 miles away)

West Middlesex has a long history of pioneering, innovative healthcare.

It opened in 1894 as the Brentford Workhouse Infirmary and became known as West Middlesex Hospital in about 1920.

The new building was built between 2001 and 2003, when the original buildings were deemed to be no longer suitable for the needs of the hospital. Approximately half of the original site was sold, allowing refurbishment of two remaining buildings at the east of the site.

Today it is at the heart of the local community: a modern, award-winning hospital with state of the art facilities.

**Trust Values**

The Trusts values demonstrate the standard of care and experience our patients and members of the public should expect from any of our services. These will underpin the work of the Trust and it is expected that all staff will work to these values on a daily basis. The values are PROUD:

- Putting patients first
- Responsive to, and supportive of, patients and staff
- Open, welcoming and honest
- Unfailing kind, treating everyone with respect, compassion and dignity
- Determined to develop our skills and continuously improve the quality of care.

**2. THE PHARMACY**

We operate one of the most modern and efficient pharmacy services in the UK with shorter patient waiting times and a safer, more effective service for patients. The spacious department which includes an inpatient dispensary, pneumatic air tubes for fast delivery of medication to wards, directorate specific clinical offices and at the heart of stock control and dispensing there is a state of the art £500,000 robotic dispensing system that dispenses and labels drugs. The robot reduces the risk of dispensing errors and also helps reduce waste by monitoring expiry dates. Using a robot releases pharmacists and technicians from traditional stock control and dispensing duties so that they can spend more time on wards helping patients and sharing their expertise with clinical staff to improve prescribing and clinical administration.
Medication is ordered through the Trust electronic patient record system and using the Trust’s computerised dispensing system.

A HIV satellite pharmacy is based in the adjacent St Stephen’s Centre, which is of the largest HIV treatment centres in Europe.

3. SERVICES

3.1 Clinical Services

Clinical pharmacy is tailored to reflect the Trust’s directorate structure. There are five teams of pharmacists and technicians which provide a comprehensive clinical pharmacy service to the hospital.

<table>
<thead>
<tr>
<th>Medicine and ED</th>
<th>Cardiology, Care of the Elderly, Dermatology, Diabetes, ED, Gastroenterology, Microbiology, Neurology, Oncology, Respiratory, Rheumatology.</th>
</tr>
</thead>
<tbody>

<tr>
<td>HIV and GUM</td>
<td>Kobler Pharmacy, West London Centre for Sexual Health, 56 Dean Street.</td>
</tr>
</tbody>
</table>

The service is tailored to meet the needs of the individual directorates and focuses on the provision of patient centred care at the bedside. The resident pharmacists provide the vital links and support to deliver an exceptional service 24 hours a day.

All pharmacists are encouraged to participate on ward rounds, write discharge prescriptions following accreditation, undertake pharmacy practice research and further develop clinical pharmacy. Ward based pharmacy technician’s duties include taking drug histories, assessing the use of patients own drugs, ordering of medicines, discharge co-ordination and counselling patients on the medication. Pharmacy technicians are also encouraged to undertake the Accredited Checking Pharmacy Technicians (ACPT) course to undertake a final check of prescriptions.

3.2 Patient Services

The supply of medicines is the backbone of the overall Pharmacy service with an estimated 37,000 transactions carried out per month with an average of 3.3 items per transaction. Considerable investment has been made to ensure that this essential service continues to serve the Trust needs.

In May 2003, the robot was installed as part of a wider pharmacy modernisation programme and electronic prescribing was fully rolled-out in the Trust by Autumn 2010. Our progressive, innovative approach to pharmacy service delivery enables technical staff to spend greater time on wards ensuring efficient patient discharge and comprehensive medicines counselling.
3.3 Technical Services

Chelsea and Westminster Hospital is one of the hospitals in the West London Cancer Network area and provides comprehensive cancer care via a multidisciplinary team to defined patient groups. The hospital is also a national specialist centre for malignancy associated with HIV infection.

As well as providing clinical pharmacy to oncology, the technical services department compounds all cytotoxic chemotherapy using standard isolator technology. In addition, sterile clinical trial products are prepared.

3.4 Medicines Information

A well-resourced Medicines Information centre - supports the safe, effective and efficient use of medicines by the provision of evidence-based enquiry service. Staff in this area respond to all queries around drug therapy. The service answers a range of enquiries that supports medicines management within the Trust and supports the pharmaceutical care of individual patients. Medicines Information also has a designated patient help-line for providing medicines information directly to patients. With an increase of HIV-related enquiries, the centre is a UKMI Specialist HIV advisory centre and is able to advise other secondary/tertiary organisations.

The use of unlicensed medicines within the Trust are also managed by the Medicines Information team and support to the Chelsea and Westminster medicines committee is provided through new drug evaluations and the updating of the formulary that is published on the Trust website.

4. EDUCATION AND TRAINING

There is a commitment within the department and throughout the London region to ensure that individuals have the opportunity to develop their skills and strengths. In addition to our own in-house training, we also participate in the region’s extensive training programme for pharmacists, technicians, pre-registration graduates and vocational students. There is extensive investment in the training for all staff. Post-graduate education is considered a vital part of staff training needs and staff are encouraged to undertake the appropriate preparation required to develop themselves in relation to their professional goals. All staff have performance development reviews and individualised personal development plans.

5. ROTATIONAL PHARMACY TECHNICIAN TRAINING SCHEME

5.1 Rotational Pharmacy Technician Training Overview

Rotational Pharmacy Technician training at the Chelsea & Westminster Hospital follows a rotational format with six months spent in 3 different sections within the pharmacy. The programme is designed to equip the technician to practice independently within each section. Each rotation follows competency based training. A higher level technician managing each rotation (Practice Supervisor) will help enable the technician to meet the desired competencies. Each technician has a Line Manager (mentor) who provides developmental support and advice to the technician on any aspect of their work.
Training and support is given in the following areas:

**Inpatient Dispensary**

You will team lead and organise the day to day running within the dispensary under supervision of the higher level dispensary technician. This will enable the development of effective time management, prioritising and organisational skills. You will also be involved in the adherence, maintenance and review of pharmacy procedures, participating in the training of pre-registration trainee pharmacy technicians and new staff. There may be an opportunity for further career development by undertaking the Accredited Checking Pharmacy Technician (ACPT) course.

**Technical Services**

Varied training in all aspects of chemotherapy (both oncology and HIV) is provided. You will assist in the maintenance of the sterile and non-sterile suite and recording of physical and microbiological monitoring.

**Medicines Management**

Under the supervision of higher level medicines management pharmacy technicians you will obtain accurate drug histories from patients and/or their representatives, assess patients own medications, counsel patients on the use of their medications and deal appropriately with queries from patients/other healthcare professionals.

**5.2 Registration**

All qualified Pharmacy Technicians must be registered with the General Pharmaceutical Council (GPhC). Please refer to the GPhC website for further information.

**5.3 Continuous Professional Development (CPD)**

It is a mandatory requirement from the GPhC that all Pharmacy Technicians undertake CPD. CPD is the continuing learning and development that a pharmacy technician undertakes throughout their career. It enables technicians to develop their career and demonstrate competence in their area of practice.

The GPhC requires all pharmacists and technicians to carry out, record and submit four CPD records, a peer discussion record and a reflective account record. Once registered with the GPhC each individual will receive a personal timeline with the details of when they are expected to submit their CPDs by.

Within the pharmacy department we have CPD facilitators to help and support individuals in the process of completing their CPD.

**5.4 Career Development**

Chelsea and Westminster Hospital prides itself on its positive approach to staff members’ career development. Pharmacy Technicians are offered the chance to undertake a variety of courses which in turn will help to develop their career. Examples of these are:

- Medicines Optimisation Programme
- Accredited Checking Pharmacy Technician (ACPT)
Management and Leadership study days

Within the department we have Pharmacy Technicians who specialise in the following areas:

- Dispensary
- Medicines Information
- Medicines Management
- Clinical Trials
- Technical Services
- Information Technology
- Sexual Health/HIV
- Education and Training

5.5 Terms and conditions

Hours of work: 37.5 hours per week
Annual Leave Entitlement: 27 days
Salary Scale: Band 4
Notice Period: 4 weeks

5.6 Departmental meetings

A programme of continuing education meetings runs throughout the year and you will be expected to attend.

CPD agenda meetings

Weekly sessions presented by various pharmacists on current areas of interest or development. Outside speakers also give presentations.

Departmental meetings

Occur weekly, various departmental and staffing matters are discussed. PTPTs will be required to participate actively.

5.7 Appraisals and performance development reviews

As part of the Rotational Technician role there will be regular and reviews to monitor the performance and ensure your development is of an acceptable standard. There are many opportunities to discuss your own individual learning and developmental needs. Performance development reviews will be conducted by their allocated Line manager every year. Section tutors will conduct appraisals at the end of each rotation.
6. MISCELLANEOUS

6.1 Social Activities

The Pharmacy has a strong tradition of being a social bunch! The department has seen it as a challenge to make the very most of the extensive restaurant and bar facilities along Fulham Road. Other local sports and fitness clubs are available at a reduced subscription e.g. Virgin Active. Staff can also take advantage of the various discounts available at local shops, restaurants and bars located in the area.

6.2 Accommodation

It may be possible to provide accommodation within the staff residences during the year, located in a prime position on the lively Fulham Road. This may be on a short or long term basis and is subject to availability.
